TECHNICAL DATA								
Material of guide ¹	AISI 304 (1.4301)	AISI 316 (1.4401)	Aluminum (6063 or 5754)	Brass				
Designation	CRG-SS304	CRG-SS316	CRG-AL	CRG-BR				
Standard length	2.44 and 3.0 meters							
Material of insert	EPDM (UV+O ₃ – resistant)							
Color of insert (RAL)	charcoal			earth				
	light smoke	sandstona						
	alabaster	milky white						

- ¹ On request, the profile can be manufactured from other materials and alloys (please ask for
- more information). 2 The standard thickness of the insert is 7 mm. Insert 4, 12b 27 or 27 mm is available on request.
- 3 Standard thickness of metal.
 4 The profile can be manufactured to any required height.

EXECUTION OPTIONS

The profile can be executed in two variants:

- 1. Insertion of the entire height of the profile.
- 2. Insert separates foam gasket (this variant is more economical without loss of performance characteristics).

EXTRAS

Additionally, the profile can be supplied with special anchors for installation.
